“Career Services has provided resources and support for our students seeking internships, and they have expanded their own network of community partners (potential employers, internships) to meet the needs of psychology majors.

ALUMNI RELATIONS LAUNCHES DYNAMIC CONTENT

Also referred to as “smart” or “adaptive” content, dynamic content refers to email subject matter that changes based on the interests or behavior of the user. In other words, smart content creates a customized experience for the viewer.

“This technology is a game changer, enabling us to send relevant content to alumni from UM-Flint’s five schools/colleges in a single monthly e-newsletter,” said Matt Bueby in Alumni Relations. “The need to maintain individual newsletters for each school and college is a thing of the past.”
