University of Michigan-Flint
Department of Nursing

TERMINAL OBJECTIVES

1 - CRITICAL THINKING: Utilize the skill of critical thinking to demonstrate effective problem solving, decision-making, and self-reflection.

2 - COMMUNICATION: Demonstrate effective use of the communication process.

3 – CRITICAL THINKING: Demonstrate the ability to gather, synthesize, and interpret information about the health status of individuals, families, communities, and populations in order to plan and deliver appropriate nursing care.

4 - NURSING PRACTICE: Demonstrate the ability to perform, teach, delegate, and supervise essential technical nursing skills, along with an understanding of the foundational scientific principles.

5 - NURSING PRACTICE: Use knowledge of health promotion, risk reduction, disease prevention and management to maximize the quality of life and maintain optimal levels of functioning through the lifespan.

6 - NURSING PRACTICE: Integrate advances in technology to enhance professional knowledge and practice.

7 - PROFESSIONALISM: Incorporate Nursing’s Code of Ethics as a basis for nursing practice.

8 - NURSING PRACTICE: Integrate traditional and complementary health care practices in nursing practice.

9 - CULTURAL COMPETENCE: Demonstrate respect for cultural and human diversity in nursing practice.

10 - NURSING PRACTICE: Understand the interrelationship among disease transmission, health policy and health care economics within the global community.

11 – CRITICAL THINKING: Apply evidence-based practice in the role of health care provider and in the creation of partnerships with patients and the interdisciplinary health care team.

12 - NURSING PRACTICE/PROFESSIONALISM: Assume the role of health care designer, coordinator, and manager to implement care and guide patients through the health care system.

13 - PROFESSIONALISM: Accept responsibility as a member of the profession, incorporating professional nursing standards and accountability into practice.
