

PROGRAM MISSION

The Radiation Therapy program offers a relevant and respected education providing high quality clinical and didactic experiences. Building from a foundation of collaboration and evidence-based curriculum, students appreciate social and cultural diversity as well as the importance of lifelong learning and service. This rewarding radiation therapy education is a cornerstone to advancing quality compassionate cancer care.

PROGRAM GOALS AND STUDENT LEARNING OUTCOMES

- Students will be clinically competent.
 - Students associate patient positioning with accurate treatment delivery.
 - Students are able to comprehend treatment plan and delineate area of treatment.
- Students will communicate effectively.
 - Students will use effective oral communication skills
 - Students will use effective written communication skills
- Students will use critical thinking and problem-solving skills.
 - Student determines patient's treatment may need to be withheld and need evaluation by physician.
 - Students are able to accurately complete treatment related calculations.
- Students will appreciate social and cultural diversity
 - Students will develop an understanding of social and cultural diversity
- Students will evaluate the importance of professional lifelong learning and service.
 - Students will determine the importance of continued professional development.
 - Students will reflect on the benefits of attending a professional meeting.
 - Students will discriminate amongst the ASRT, ARRT and JRCERT

ACCREDITATION INFORMATION

The University of Michigan-Flint's Radiation Therapy Program is accredited through the Joint Review Committee on Education in Radiologic Technology (JRCERT). The program submitted a self-study in October 2012 and had a site visit August 2013. The program was awarded full 8-year accreditation. For more information on program effectiveness please go to www.jrcert.org.

PROGRAM COMPLETION RATE

This is measured annually of the number of students that begun the program divided by the number of students who completed the program. The program completion rate in 2020 was 100%. Ten of the ten students expected to complete the program did.

FIVE-YEAR AVERAGE CREDENTIALING EXAMINATION

This is the number of students that pass the American Registry of Radiologic Technologists (ARRT) certification examination on the first attempt within six months of graduating from the program. 89.1% is the five-year average of students who passed their radiation therapy boards on first attempt. This average is taken from graduating classes in 2015 through 2019, total of 37 students with thirty-three passing.

FIVE-YEAR AVERAGE JOB PLACEMENT RATE

Seventeen out of eighteen graduates (2015-2019) actively seeking employment, responded to a graduate survey that they were employed either fulltime, part time or PRN in the field of radiation therapy. Our five-year average job placement rate within 12 months of graduation is 94.4%%.

The JRCERT has defined “not actively seeking employment” as:

1. Graduate fails to communicate with program officials regarding employment status after multiple attempts or
2. Graduate is unwilling to seek employment that requires relocation or
3. Graduates is unwilling to accept employment due to salary or hours of
4. Graduate is on active military duty or
5. Graduate is continuing education.
