# Discover the Summer Clinical Experience in Literacy Education at UM-Flint!

Our Summer Clinical experience is a two-week seminar offering our Literacy Education graduate students an opportunity to work directly with children in the Flint community. For out-of-area graduate students, we offer a residency option on campus, allowing you to experience the popular restaurants and places of downtown Flint. This unique experience will welcome you to the culturally rich community and campus of the University of Michigan-Flint.

In this two-week intensive Summer Clinical Seminar, you will:

- Experience a summer school program within a diverse school setting of the greater Flint community, preparing you to meet the needs of all learners in a variety of contexts;
- Work with children across grades K-3 and 4-8 to gain a diversity of literacy coaching, teaching, and developmental experiences;
- Experience collaborative teaching models, including individualized and small group instruction, for delivering literacy instruction and assessment;
- Receive on-site instruction and support in developing your instructional practices and assessment knowledge for literacy development and learning; and
- Work with UM-Flint's faculty in Literacy Education who will join you in the field on a daily basis.

This six-credit Summer Clinical Seminar is part of the **Master of Arts in Literacy Education** at UM-Flint. This seminar develops literacy leaders in alignment with the new International Literacy Association (ILA) Standards (2017) for Preparing Specialized Literacy Professionals.

For program course sequence and more information, visit [www.umflint.edu/literacy](http://www.umflint.edu/literacy).
